No notes, graphing calculators or other tools are permitted. There are 30 points in total. You need to show work to receive full credit.

Good luck!

Problem 1. (6 points) Compute the following series (or state that it diverges):

(a) $\displaystyle\sum_{n=1}^{\infty} \frac{2-5^n}{3^n}$

(b) $\displaystyle\sum_{n=1}^{\infty} \frac{5-2^n}{3^n}$

Problem 2. (4 points) Determine the following limits or state that the limit does not exist.

(a) $\displaystyle\lim_{n\to\infty} \frac{3n-5n^2}{4+2n^2} =$

(b) $\displaystyle\lim_{n\to\infty} \frac{2^n-4^n}{7n^5+3^n} =$

(c) $\displaystyle\lim_{n\to\infty} \sqrt{\frac{3n^2+5}{1+2n+4n^2}} =$

(d) $\displaystyle\lim_{n\to\infty} \cos\Big(\frac{n}{2n^2+1}\Big) =$

Armin Straub
straub@southalabama.edu

Problem 3. (10 points) Determine whether the following series converge or diverge. Make sure to indicate a reason!

(a) $\displaystyle\sum_{n=2}^{\infty} \frac{2+3\log(n)}{4+5\log(n)}$

☐ series converges ☐ series diverges

Indicate a reason:

(b) $\displaystyle\sum_{n=1}^{\infty} \frac{5n+1}{2n^3+1}$

☐ series converges ☐ series diverges

Indicate a reason:

(c) $\displaystyle\sum_{n=2}^{\infty} \frac{5^n}{n^2 3^n}$

☐ series converges ☐ series diverges

Indicate a reason:

(d) $\displaystyle\sum_{n=1}^{\infty} \frac{(-1)^n}{\sqrt{2n+1}}$

☐ series converges ☐ series diverges

Indicate a reason:

(e) $\displaystyle\sum_{n=2}^{\infty} \frac{\sqrt{n}+2n+3}{4n^2+1}$

☐ series converges ☐ series diverges

Indicate a reason:

Problem 4. (10 points) Consider the power series $\displaystyle\sum_{n=1}^{\infty} \frac{(x+2)^n}{\sqrt{n}\,3^n}$.

(a) Determine the radius of convergence R.

(b) What is the exact interval of convergence?

(c) Let $f(x) = \displaystyle\sum_{n=1}^{\infty} \frac{(x+2)^n}{\sqrt{n}\,3^n}$ for x such that $|x+2| < R$. Write down a power series for $f'(x)$.
